## About This Game

Collect thousands of cards, build exciting decks, then pit them against cunning AI opponents in the campaign and skirmish modes, or play against others via our cross-platform multiplayer servers. Make the top 100 for a big monthly prize, or just chill out playing one of the many specialised gameplay types just for fun.

## Gameplay

Choose your starter deck and battle through the extensive single player campaign to build your forces and customise your collection. Go heavy with the brute-force melee Warriors, support them with Archers, or throw in a few big bangs with the Mages; the choice is yours.

Supplement your deck with weapons, armor, instant spells and more. Balance and planning is key to make sure you get the cards you need at just the right time.

The battles are unforgiving - topple your opponent's Hero before they nail yours. Positioning is everything as you claim bonus tiles on the board and out-maneuvre your foes. Most of your Monsters have special abilities like *Teleportation*, *Meteor Shower* and *Heal* to name just a few. These can be game-changers if used at the right moment.

## Key Features

- Card Gaming Evolved – Combat Monsters combines the best elements of collectible card games with action-packed turn-based strategy gaming. Building a good deck is only half the story - once the gameplay starts, you must play and

---

manoeuvre your pieces on the game board, battling them out like a standard RPG.

- Strategize – A complete Deck Building package lets you customise multiple decks, so special tactics for each mode are not just viable, they're encouraged.
- Extensive Multiplayer - Built primarily as a multiplayer game, Combat Monsters doesn't disappoint in the Online Arena. We have tense 1v1s, mad 6-player free-for-alls and everything in between. Real-time or asynchronous, the choice is yours. An automated rating system will keep you challenged fairly no matter your experience level.
- Massive Content – 3,000+ cards with unique abilities and upgrades will keep you busy deck-building between the fighting. Over 1,600 of them are unique combat monsters, each with their own strengths, weaknesses, special abilities and racial abilities.

This is a cross platform game, available on other formats such as iOS and Android, and requires internet access to Rubicon's game server to allow play with players on other platforms. Once you have a game account created, you can play through the game on any supported platform, changing between them seamlessly.

24 man-years in the making by a BAFTA nominated studio, Combat Monsters is now in its fifth major expansion with still more to come in future.

Ignore the negative press - the developers are not money hungry freemium advertising junkies. This game is brilliant: the single player is enormous for a free-to-play, with increasing difficulty as you proceed in the campaign, and refreshingly so (finally a game that genuinely challenges the strategist in all of us!) Forget SIM City, forget Magic:the gathering, forget 3D Chess: this game has ALL OF IT, with humour and a fascinating amount of strategies, even more so with the latest v3:reinforcements release. This game is SO BIG that it reminds of the good old days of \u00a330 PC games with full content, a great single player AND brilliantly fun multiplayer (once you get to grips with single player of course!). It was a no-brainer to buy the tripler for \u00a32.99 after the first few rounds as quality and challenge shines through and you know when a top game that only comes around once in a blue moon grabs your attention. DO NOT BE FOOLED by the 'Legendary' or 'Rare' cards - having played this game for more than a year, I can safely say it is all about a good strategy, and with v3 there is even a mode called 'Pauper' where NO legendary and rare cards are even allowed :D. With the plethora of monsters, equipment and spells to pick from, there really is something for everyone and the variety in strategies plus the new daily challenges AND the testing single player campaign (that you can now play 4 times over with the different modes) is simply BRILLIANT - this is THE BEST GAME (I've even sold my now dust-collecting Xbox). THANK YOU RUBICON
